Objective

I am seeking a competitive and challenging environment where I can serve the organization, establish a path to help the company meet and achieve its goals and, in the process, achieve success.

Technical Skills

Operating System	: WINDOWS
Programming Languages	: Python, R
Data Science Toolset	: Pandas, Numpy, TensorFlow, OpenCV2, NLP, Currently working on PostgreSQL project.
Data Visualization	: PowerBi, Matplotlib, Seaborn
Web Scraping	: Beautiful Soup, Scrapy
Developer Tools	: Visual Studio Code, Android Studio, Figma, Spyder, R Studio

Areas of Interest

- Statistics, Business Intelligence.

Academic Projects

Fatigue Detection In Badminton Players		
Team Size: 4	Language: Python	ME First Year Project
Description: Comprehensive analysis of badminton players' gait patterns to discern notable changes. Employing peak detection algorithms to identify key moments during physical activity. Correlating observed gait variations with performance levels and fatigue states to gain insights into players' physiological responses. The ultimate objective is the development of a robust fatigue detection system, integrating data from gait analysis and peak physical activity moments to provide a reliable metric for monitoring and optimizing player performance. This project aims to enhance training		

strategies and injury prevention by understanding the intricate relationship between gait dynamics and player fatigue.

Covid Bed Management System.

Team Size: 4

Language: HTML, CSS Java
Bootstrap

BE DBMS Mini Project

Description: Provides and manages various online Covid Bed Booking Activities such as Patient Registration, Bed allotment and other Treatment Facilities available in the Hospital. It allows normal users to avail for register, login and book the beds according to the severity of their systems..

Responsibilities:

- Hospital management can register their hospital on the website.
- Hospital can login using credentials given by administrator.
- User can view the availability of beds in different categories in different hospitals and also book bed as required bed type.

Celestial Exploratory.

Team Size: 4

Technology: OpenGL library in C

BE 6th Semester Mini Project

Description: Designed completely using Open GL functions. This game consists of 8 planets of the solar system. The player uses the assigned keys to rotate and revolve the planets. Specific keys have also been assigned rotate the sun around its own axis. User can use the left and right mouse buttons to rotate the planets clockwise and anti-clockwise respectively. User can also make the stars and comets shine using specific keys.

Tic Tac Toe

Team Size: 4

Technology: Android Studio, Kotlin

BE 6th Semester Mini Project

Description: Mobile application that was developed using android studio. Tic Tac Toe is a simple multiplayer game with fully observable environments in which two agents or players act alternately and the utility values at the end of the game are always equal and opposite.

Sentiment Manifestation of Kannada Tweets.

Team Size: 4

Language:Python

BE Final Year Project

Description: The main goal of sentiment analysis is to detect and analyze attitudes, opinions, or sentiments in the text. The process of analysis includes selecting features and opinions, which is a challenging task in languages other than English. Sentiment analysis of Kannada tweets has been performed, where tweets are not only classified based on negative or positive comments, but also based on the emotions expressed. These emotions can be classified as happy, sad, angry, surprised, and

fearful. The polarity of the emotions adds up to 1.0.

Educational qualification

Class/Course	Name of Institute	Board/University	Year of Passing	Marks%
M.E (AI & ML)	Manipal School of Information Sciences (MSIS)	Manipal Academy of Higher Education (MAHE), Manipal	2025	8.24 CGPA
B.E (Computer Science and Engineering)	Jawaharlal Nehru New College of Engineering, Shimoga, Karnataka	Visvesvaraya Technological University	2023	7.81 CGPA
PUC	Expert PU College, Mangalore, Karnataka	Karnataka State Board	2019	82%
SSC	Jnanadeepa Senior Secondary High School, Shimoga, Karnataka	Central Board of Secondary Education	2017	8.4 CGPA

Internship

- Big data analytics and data visualization using PySpark, Elastic and Kibana under Ekathva Innovations Pvt. Ltd.

Hobbies

- Gym.
- Swimming.
- Cooking.
- Travelling.

Certifications

- Microsoft Azure AI Fundamentals from Microsoft Azure.
- DeepLearning.AI TensorFlow Developer from Coursera.

Languages Known

- Kannada, English, Hindi.

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge.
